

INTERNET OF PRODUCTION

28th November 2025

REF: Letter of Intention for Maps of Making Project

Dear NL Net and to whom it may concern,

The Internet of Production Alliance is strongly supportive of the Maps of Making Project and hereby confirm our intent to participate in it. Specifically, and with our own funds, we will:

1. Provide support in the use of the Open Know-Where www.openknowwhere.org data standard for the geographic location of machines.
2. Share our approach to the mapping of manufacturing facilities, such as makerspaces, and machines, including on compliance with GDPR and security considerations.
3. Provide access to our existing datasets of makerspaces, manufacturing facilities and machines (through an API etc) which we host on behalf of the members of our Alliance – see <https://map.internetofproduction.org>. This includes large datasets from networks of makerspaces in our Alliance, such as the Africa Makerspaces association and groups in Iraq, Nepal and Philippines etc, and the global FabLab community.
4. Promote, communicate and host community events etc about this project with our Alliance, including on gathering user requirements, feedback, validation and launch etc.
5. If required in the longer-term, we will provide a 'safe home' for the data that is collected and mobilise our community to continue to update, maintain and publish its data.

We are particularly pleased that this excellent and well-connected team has come together to support this project, which is closely aligned with our own priorities and activities. Our engagements with them in recent years have including promoting the open movement and the development of makerspaces around Europe and the world. We are excited and hopeful for the opportunity to engage with them again on this important work. And we are big fans of NL Net too!

Yours sincerely,

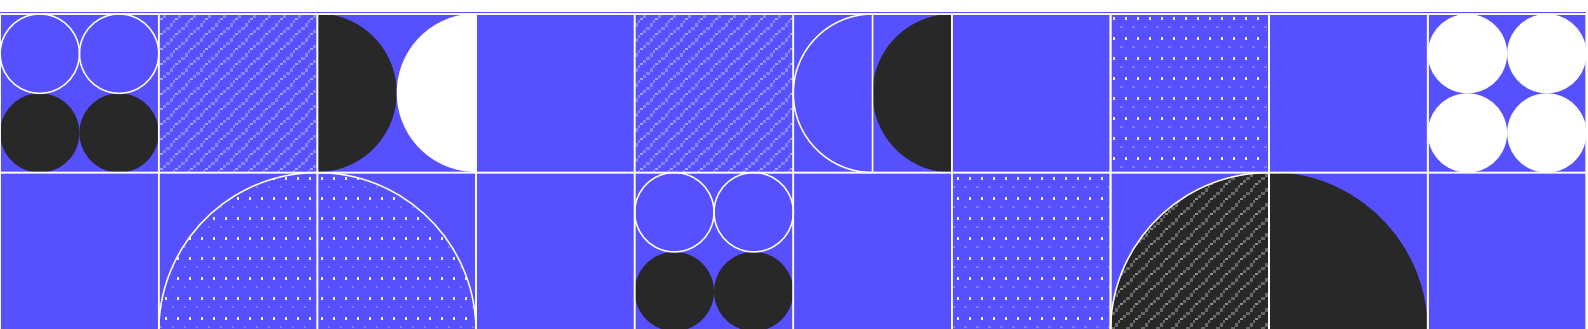

Andrew Lamb

Alliance Chair

Letter of Intention - Maps of Making Project

We, **RFFLabs**, representing **+120 members** makerspaces/hackerspaces/community workshops across **France**, express our intention to participate in the Maps of Making federated commons project.

We understand that Maps of Making will:

- Create a federated commons infrastructure for makerspace mapping
- Ingest data directly from individual makerspace websites and sources
- Display aggregated data on a unified map
- Provide map infrastructure that networks can also embed and use

We intend to:

- Facilitate communication between the Maps of Making team and our member spaces
- Encourage our members to participate in workshops and share their needs
- Share project updates and communication materials with our member spaces
- Support the development of this commons infrastructure

RE: Letter of Intention – Maps of Making Project

25th November 2025

To whom it may concern,

The Humanitarian Technology Trust, is a UK Charity focused on the development and scaling of open source technology, we are one of the core organisers of the OpenFlexure Project. The OpenFlexure Project designs laboratory-grade digital robotic microscopes that have been made and used in over 60 countries that *we know of*.

Our project's biggest strength is its distributed community, every member is empowered to build upon our work anywhere in the world. At the same time collecting and curating this data to monitor our impact, report our successes, and learn from our community is difficult and time consuming.

We understand that Maps of Making will:

- Create a federated commons infrastructure for makerspace mapping
- Ingest data directly from individual makerspace websites and sources
- Display aggregated data on a unified map
- Provide map infrastructure that networks can also embed and use

We believe this work will both help us to find new collaborators, and enable us to pair those who need microscopes with those who can build, service, and maintain the hardware.

We intend to:

- Facilitate communication between the Maps of Making team and our community
- Encourage our community to participate in workshops and share their needs
- Share project updates and communication materials with our community
- Support the development of this commons infrastructure

If you require any further details, please contact me directly at julian@httrust.org. More information on the OpenFlexure Project can be found at <https://openflexure.org>.

Yours Faithfully

Dr. Julian Stirling
Chief Executive

Letter of Intention - Maps of Making Project

We, **FabCare**, representing **100** makerspaces/hackerspaces/community workshops worldwide, express our intention to participate in the Maps of Making federated commons project.

We understand that Maps of Making will:

- Create a federated commons infrastructure for makerspace mapping
- Ingest data directly from individual makerspace websites and sources
- Display aggregated data on a unified map
- Provide map infrastructure that networks can also embed and use

We intend to:

- Facilitate communication between the Maps of Making team and our member spaces
- Encourage our members to participate in workshops and share their needs
- Share project updates and communication materials with our member spaces
- Support the development of this commons infrastructure

Letter of Intention - Maps of Making Project

FabLab Cuenca, a community workshop in Spain, expresses our intention to participate in the Maps of Making federated commons project.

We understand that Maps of Making will:

- Create a federated commons infrastructure for makerspace mapping
- Ingest data directly from individual makerspace websites and sources
- Display aggregated data on a unified map
- Provide map infrastructure that networks can also embed and use

We intend to:

- Facilitate communication between the Maps of Making team and our member spaces
- Encourage our members to participate in workshops and share their needs
- Share project updates and communication materials with our member spaces
- Support the development of this commons infrastructure

Tog Hackerspace DAC
Unit 1B Motor City,
Kilemore Road,
Dublin 12,
D12 CF6V
info@tog.ie
26th November 2025

Dear Sir / Madam,

I am writing on behalf of Tog Hackerspace DAC to express our strong support for, and intention to participate in, the **Maps of Making** federated commons project.

Tog Hackerspace DAC is a non-profit Designated Activity Company. Our main objective is to develop an inclusive community interested in the pursuit of innovation in science, technology, modern culture, and the creative arts. We are a self-funded members' organisation that provides a physical space and support for our members and the wider public. Since our founding over sixteen years ago, Tog has been involved in many public engagement activities including Engineers Week, being the home for the TV show *Big Life Fix*, Coolest Projects, Dublin Maker, Coder Girl Hack Day, Inspire Fest, Carnival of Science, and Science Week, to name a few.

We see the Maps of Making project as a valuable piece of shared infrastructure that will strengthen the maker ecosystem locally and internationally. As we understand it, Maps of Making will:

- Create a federated commons infrastructure for makerspace mapping
- Ingest data directly from individual makerspace websites and other sources
- Display aggregated data on a unified map
- Provide map infrastructure that networks and organisations can also embed and use

Such an infrastructure will make it easier for people to discover their local makerspaces, understand what facilities exist around them, and connect communities working on similar challenges.

Tog Hackerspace DAC intends to actively participate in and support this project. In particular, we are committed to:

- Facilitating communication between the Maps of Making team and our community
- Encouraging our members and partner spaces to participate in workshops and share their needs and experiences
- Sharing project updates and communication materials through our internal channels and wider networks
- Supporting the development and refinement of this commons infrastructure by contributing feedback, data about our space, and examples of use in practice

We believe that a shared, federated map of makerspaces will be a powerful tool to connect communities, reduce duplication of effort, and help more people find pathways into making, repair, and creative technology. For these reasons, we are pleased to add our support to the Maps of Making project and look forward to collaborating as the work develops.

Yours sincerely,
Jeffrey Roe
Director
Tog Hackerspace DAC

Letter of Intention - Maps of Making Project

We, **FabLab Valsamoggia**, representing **50** makers of a local community between Bologna and Modena (ITALY), express our intention to participate in the Maps of Making federated commons project.

We understand that Maps of Making will:

- Create a federated commons infrastructure for makerspace mapping
- Ingest data directly from individual makerspace websites and sources
- Display aggregated data on a unified map
- Provide map infrastructure that networks can also embed and use

We intend to:

- Facilitate communication between the Maps of Making team and our member spaces
- Encourage our members to participate in workshops and share their needs
- Share project updates and communication materials with our member spaces
- Support the development of this commons infrastructure

Letter of Intention - Maps of Making Project

I, **Marius Araújo**, Fab Manager of _ARTERIA_LAB, a maker space of the University of Évora, Portugal, representing **approximately 1000** makers and users across **the Alentejo region**, express our intention to participate in the Maps of Making federated commons project.

We understand that Maps of Making will:

- Create a federated commons infrastructure for makerspace mapping
- Ingest data directly from individual makerspace websites and sources
- Display aggregated data on a unified map
- Provide map infrastructure that networks can also embed and use

We intend to:

- Facilitate communication between the Maps of Making team and our member spaces
- Encourage our members to participate in workshops and share their needs
- Share project updates and communication materials with our member spaces
- Support the development of this commons infrastructure

Letter of Intention - Maps of Making Project

I, Thomas Sanz, researcher specialised in geography, express my intention to participate in the Maps of Making federated commons project.

I understand that Maps of Making will:

- Create a federated commons infrastructure for makerspace mapping.
- Ingest data directly from individual makerspace websites and sources.
- Display aggregated data on a unified map.
- Provide map infrastructure that networks can also embed and use.

I intend to:

- Facilitate communication between the Maps of Making team and my professional network.
- Participate in workshops to provide expertise regarding geography and mapping.
- Share project updates and communication materials within my academic and professional circles.
- Support the development of this common infrastructure through research insights.
